

Bokkena Harsha Teja

+91 8328185775 | harshadeveloper06@gmail.com | Vizianagaram , Andhra Pradesh | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

AI & ML Engineer with experience building scalable ML and RAG-based systems across finance, healthcare, and real estate domains. Improved model performance by up to 20% through feature engineering and optimization. Skilled in Python, LLM integration, and deploying data-driven applications.

Domain/Functional Areas

- Web & Software Development
- ServiceNow Enterprise Platform
- Artificial Intelligence & Machine Learning
- Data Analytics & Visualization

Key Skills

Programming Languages: Python, Java, C, C++, SQL/MySQL
Generative AI & LLMs: LangChain, LangGraph, ChromaDB, CrewAI, Ollama, Multi-Agent Systems, RAG
Machine & Deep Learning: TensorFlow, Keras, Scikit-Learn, Pandas, NumPy, Transfer Learning, Feature Engineering, Model Evaluation
Web Development & Deployment: FastAPI, Streamlit, React.js
Enterprise Platforms: ServiceNow (CSA Certified, ACLs, Flow Designer)
Core Computer Science: DSA, OS, CN, DBMS

Professional Experience

SmartBridge Educational Services Remote
AI & ML Intern (Internship) Jun 2025 - Aug 2025

- Reduced data inconsistencies by 30% across 10k+ records using robust preprocessing pipelines.
- Boosted model accuracy by 15–20% through structured feature engineering and hyperparameter tuning.
- Mitigated overfitting by identifying the top 15 high-impact features via EDA, reducing validation error margins by 20%.

Skills: Python, Scikit-Learn, Pandas, NumPy, Data Preprocessing, EDA, Machine Learning Algorithms

1Stop.ai Remote
Machine Learning Intern (Internship) May 2025 - Jun 2025

- Engineered classification models achieving 85% accuracy on structured healthcare datasets.
- Improved model F1-score by 10% through systematic hyperparameter optimization and cross-validation.
- Benchmarked the performance of 4 classification models using ROC curves, ultimately selecting a final model that achieved a 0.89 AUC score.

Skills: Python, Scikit-Learn, Pandas, NumPy, Feature Engineering, Model Evaluation

InTrainz Remote
Web Development Intern (Internship) Nov 2024 - Jan 2025

- Developed 5 responsive user interfaces using HTML, CSS, and JavaScript, cutting layout defects by 25% through rigorous cross-device testing and improving overall rendering speeds by 15%.
- Integrated 10+ FastAPI endpoints with frontend components, reducing data retrieval latency by 30%.

Skills: HTML, CSS, JavaScript, MySQL, Frontend & Backend Basics, React.js, FastAPI

Projects

CSM Systems Dashboard - Full-Stack Web Development [Project Link](#) Jun 2026 - Jun 2026
[React.js , Vite , backend/API , Git , Vercel , Type Script ,]

- Engineered a full-stack batch portal (CSM 2023-2027) for 60+ students using React.js, TypeScript, and Vite, centralizing academic details and improving information accessibility.

Real Estate Research Tool - Generative AI, RAG Architecture, LLM Integration [Project Link](#) [Presentation Link](#) Jan 2026 - Feb 2026
[Python / LangChain / HuggingFace Embeddings / ChromaDB / Llama (Groq API) / Streamlit / Semantic Search / Vector Databases]

- Architected a RAG pipeline to semantically chunk and index 500+ financial news articles, accelerating query retrieval times by 40%.
- Stored HuggingFace embeddings in ChromaDB to enable scalable, high-speed vector similarity search.
- Integrated Llama 3 via Groq API to generate source-grounded responses, reducing AI hallucinations by an estimated 30% against baseline models.

Health Insurance Premium Prediction - Machine Learning (Regression Models) [Project Link](#) [Presentation Link](#) Dec 2025 - Dec 2025
[Python / Pandas, NumPy / Scikit-Learn / Data Preprocessing & Feature Engineering / Regression Algorithms]

- Trained regression models on 10k+ records using 10+ demographic and medical features, successfully lowering RMSE by 18% through advanced outlier handling.
- Benchmarked Linear, Ridge, and XGBoost regressors against a 10,000+ record dataset, ultimately boosting prediction accuracy by 15%.

Credit Risk Model - FinTech & BFSI (Credit Risk Analytics) [Project Link](#) [Presentation Link](#) Dec 2025 - Dec 2025
[Python / Pandas / Scikit-Learn / Classification Modeling / Feature Engineering]

- Analyzed borrower risk models across 15,000+ financial records, optimizing risk management protocols for NBFC compliance.
- Reduced loan approval false positives by 6% on 10k+ records, improving credit risk screening reliability.
- Evaluated model performance using ROC-AUC curves, identifying a 12% improvement in precision-recall metrics over baseline models.

Car Damage Prediction - Deep Learning [Project Link](#)

[Python / NumPy / Pandas / OpenCV / TensorFlow / Keras / ResNet50 / Transfer Learning / Streamlit] Dec 2025 - Jan 2026

- Designed a deep learning–based vehicle damage classification system using transfer learning (ResNet50).
- Trained the model on ~1700 labeled car images across six damage categories, achieving ~80% validation accuracy.
- Deployed a Streamlit web application supporting concurrent real-time image uploads, delivering instant damage predictions with 80% validation accuracy.

Certifications

- **ServiceNow Enterprise Applications - ServiceNow**
Issued on: May 2026 [Certification Link](#)
- **AI Engineering & Data Science Bootcamp - Codebasics**
Issued on: Mar 2026 [Certification Link](#)
- **AWS ML Foundations - AWS**
Issued on: Feb 2026 [Certification Link](#)
- **Web Development Bootcamp - Udemy**
Issued on: Dec 2024 [Certification Link](#)

Education

MVGR College of Engineering **Vizianagaram, Andhra Pradesh**
B.Tech - AIML Sep 2023 - Present

Additional Information [Link](#)

Languages: English, Telugu
Core Skills: Analytical & Problem-Solving, Technical Leadership
Extracurriculars: Active hackathon competitor. Organized and mentored participants for a nationwide campus hackathon.
