

Bokkena Harsha Teja

+91 8328185775 | harshadeveloper06@gmail.com | Vizianagaram , Andhra Pradesh | [LinkedIn](#) | [GitHub](#)

AI & ML Engineer with experience building scalable ML and RAG-based systems across finance, healthcare, and real estate domains. Improved model performance by up to 20% through feature engineering and optimization. Skilled in Python, LLM integration, and deploying data-driven applications.

Domain/Functional Areas

- Web & Software Development
- Artificial Intelligence, Machine Learning & Generative AI
- NLP, Data Analytics & Visualization
- ServiceNow CSA (Certified System Administrator)

Key Skills

Programming Languages: Python, Java, C, C++, SQL/MySQL
Machine Learning: Scikit-Learn, Pandas, NumPy, Feature Engineering, Model Evaluation
Deep Learning: TensorFlow, Keras, Transfer Learning
LLMs & RAG: Llama 2, LangChain, LangGraph, ChromaDB, CrewAI, Multi-Agent Systems, Ollama
Web & Deployment: FastAPI, Streamlit, React.js
ServiceNow & Core CS: CSA Certified, ACLs, Flow Designer, DSA, OS, CN, DBMS

Professional Experience

EduSkills (Supported by AICTE & AWS Academy)	Virtual / Remote
Data Engineering (Internship)	Oct 2025 - Dec 2025

- Designed ETL workflows for structured datasets using cloud-based data processing concepts.
- Applied scalable data transformation techniques aligned with AWS Academy standards.
- Documented workflow architectures to ensure reproducibility and structured data governance.

Skills: Data Engineering Fundamentals, AWS Academy Curriculum, Data Pipelines, Structured Data Processing, Cloud Basics, Data Workflow Management

SmartBridge Educational Services Pvt. Ltd.	Virtual
AI & ML Intern (Internship)	Jun 2025 - Aug 2025

- Reduced data inconsistencies by 30% across datasets containing 10k+ records using preprocessing pipelines and validation rules.
- Increased model accuracy by 15–20% through structured feature engineering and hyperparameter tuning.
- Identified high-impact predictive variables using exploratory data analysis to improve generalization.

Skills: Python, Pandas, NumPy, Scikit-Learn, Data Preprocessing, Exploratory Data Analysis (EDA), Machine Learning Algorithms, Problem-Solving

1Stop.ai	Remote
Machine Learning Intern (Internship)	May 2025 - Jun 2025

- Engineered classification models achieving 85% accuracy on structured healthcare datasets.
- Improved F1-score by 10% through systematic hyperparameter optimization.
- Validated model performance using precision-recall metrics and confusion matrix analysis.

Skills: python, Pandas, NumPy, Scikit-Learn, Data Preprocessing, Feature Engineering

InTrainz	Remote
Web Development Intern (Internship)	Nov 2024 - Jan 2025

- Developed responsive interfaces using HTML, CSS, and JavaScript.
- Cut layout defects by 25% through cross-device testing.
- Enabled API-driven data flow by integrating FastAPI endpoints with frontend components.

Skills: HTML, CSS, javascript, MySQL, Frontend & Backend Basics, React.js, FastAPI

EduSkills (Supported by Google for Developers)	Virtual / Remote
Android Intern (Internship)	Jul 2024 - Sep 2024

- Structured XML-based Android screens, reducing UI rework by 25% across iterations.
- Integrated REST APIs to lower manual UI updates by 30%.
- Lowered crash incidents by 20% through runtime fixes.

Skills: Android Development, Java / Kotlin, XML Layout Design, UI/UX for Mobile Apps, API Integration Basics

Projects

Real Estate Research Tool - Generative AI, RAG Architecture, LLM Integration	Project Link
[Python / LangChain / HuggingFace Embeddings / ChromaDB / Llama (Groq API) / Streamlit / Semantic Search / Vector Databases]	Jan 2026 - Feb 2026

- Architected a Retrieval-Augmented Generation (RAG) pipeline that extracts financial news articles and performs semantic chunking for optimized indexing.. - Generated embeddings using HuggingFace models and stored vectors in ChromaDB for scalable similarity search. - Integrated Llama (via Groq API) to deliver source-grounded responses, improving contextual accuracy and reducing hallucination.	
Health Insurance Premium Prediction - Machine Learning, Regression Modeling, Health & Insurance Analytics Project Link	
[Python / Pandas, NumPy / Scikit-Learn / Data Preprocessing & Feature Engineering / Regression Algorithms]	Dec 2025 - Dec 2025
- Trained regression models on 10k+ records using 10+ demographic and medical features. - Lowered RMSE by 18% through outlier handling. - Performed model selection by comparing Linear, Ridge, and XGBoost regressors.	
Credit Risk Model - Finance Analytics, Machine Learning, Risk Modeling (NBFC/Banking) Project Link	
[Python / Pandas / Scikit-Learn / Classification Modeling / Feature Engineering]	Dec 2025 - Dec 2025
- Built borrower risk classifiers on financial datasets. - Reduced loan approval false positives by 6% on 10k+ records, improving credit risk screening reliability. - Evaluated credit risk models using Scikit-Learn, ROC-AUC, and confusion matrices.	
Car Damage Prediction - Deep Learning Project Link	
[Python / NumPy / Pandas / OpenCV / TensorFlow / Keras / ResNet50 / Transfer Learning / Streamlit]	Dec 2025 - Jan 2026
- Built a deep learning–based vehicle damage classification system using transfer learning (ResNet50). - Trained the model on ~1700 labeled car images across six damage categories, achieving ~80% validation accuracy. - Developed a Streamlit-based web interface for real-time image upload and instant damage prediction.	
Sentiment Analysis - Natural Language Processing (NLP), Social Media Analytics, Machine Learning Project Link	
[Python / Pandas, NumPy / NLTK / TextBlob / Scikit-Learn / Sentiment Classification / Data Preprocessing (tokenization, stopword removal)]	Sep 2025 - Sep 2025
- Transformed social media text using tokenization and vectorization techniques. - Achieved 84% accuracy across sentiment classes.	
ChatGPT Clone using Ollama + Llama 2 - Generative AI, NLP, Conversational Agents Project Link	
[Python / Llama 2 / Ollama / Prompt Engineering / FastAPI (API Integration & Backend) / NLP (Conversational Modeling)]	Jan 2025 - Jan 2025
- Deployed a Llama-2-based conversational chatbot with FastAPI backend. - Reduced response latency by 20% via prompt optimization.	

Certifications

The Complete 2024 Web Development BootCamp - Udemy Issued on: Dec 2024 Certification Link Python for Deep Learning : Build Neural Network in Python - Udemy Issued on: Mar 2025 Certification Link Python Essentials 2 - CISCO Issued on: Feb 2025 Certification Link Master Machine Learning for Data Science - Codebasics Issued on: Dec 2025 Certification Link Deep Learning - Codebasis Issued on: Jan 2026 Certification Link Natura Langauge Processing - Codebasics Issued on: Jan 2026 Certification Link ServiceNow Certified System Administrator (CSA) - ServiceNow Issued on: May 2026 Certification Link GenAI and AgenticAI - CodeBasics Issued on: Mar 2026 Certification Link ServiceNow Certified Application Developer (CAD) - Service Now Issued on: Jun 2026 Certification Link
